Ginnie Mae I
Graduated Payment Mortgages

U.S. Department of Housing
and Urban Development
Government National Mortgage
Association

\$ _____

_____ % Ginnie Mae I Mortgage-Backed Securities
(Graduated Payment Mortgages)

Guaranteed as to the Timely Payment of Principal and Interest
by the Government National Mortgage Association
(Backed by the Full Faith and Credit of the United States)

Issued by:

| | |
|---|--------------------|
| Ginnie Mae Pool No.: | First Payment Due: |
| Issue Date: | Maturity Date: |
| Depository: The Federal Reserve Bank of New York | Transfer Agent: |

The securities offered hereby (the “Securities”) provide for the timely payment of principal and interest on the fifteenth day of each month, except as stated herein, commencing in the month following the month of issuance. Interest will accrue on the Securities at the per annum rate specified above; installments of principal will be payable in relation to payments of principal on the underlying pool of mortgages described herein. The maturity date for the Securities is based on the mortgage with the latest maturity. See “Maturity, Prepayment, and Yield” herein for a discussion of certain significant factors that should be considered by prospective investors in the Securities offered hereby.

The Government National Mortgage Association (“Ginnie Mae”) guarantees the timely payment of principal and interest on the Securities. The Ginnie Mae guaranty is backed by the full faith and credit of the United States of America.

The Securities are exempt from the registration requirements of the Securities Act of 1933, as amended, and are “exempted securities” within the meaning of the Securities Exchange Act of 1934, as amended.

Ginnie Mae Guaranty

Ginnie Mae is a wholly-owned corporate instrumentality of the United States of America within the Department of Housing and Urban Development with its principal office at 451 Seventh Street, S.W., Washington, D.C. 20410. Timely payment of principal of and interest on the Securities is guaranteed by Ginnie Mae pursuant to Section 306(g) of the National Housing Act of 1934, as amended (the “National Housing Act”). Section 306(g) provides that “[t]he full faith and credit of the United States is pledged to the payment of all amounts which may be required to be paid under any guaranty under this subsection.” An opinion, dated December 9, 1969, of

William H. Rehnquist, Assistant Attorney General of the United States, states that such guaranties under Section 306(g) of mortgage-backed securities of the type offered hereby are authorized to be made by Ginnie Mae and “would constitute general obligations of the United States backed by its full faith and credit.”

Borrowing Authority—United States Treasury

Ginnie Mae, in its corporate capacity under Section 306(d) of the National Housing Act, may issue to the United States Treasury its general obligations in an amount outstanding at any one time sufficient to enable Ginnie Mae, with no limitations as to amount, to perform its obligations under its guaranty of the timely payment of the principal of and interest on the Securities offered hereby. The Treasury is authorized to purchase any obligations so issued.

The Treasury Department has indicated that it will make loans to Ginnie Mae, if needed, to implement the aforementioned guaranty as stated in the following letter:

The Secretary of the Treasury
Washington

February 13, 1970

Dear Mr. Secretary:

I wish to refer to your letter of November 14, 1969 asking whether the timely payment of principal and interest on mortgage-backed securities of the pass-through type guaranteed by the Government National Mortgage Association under Section 306(g) of the National Housing Act under its management and liquidating function is a function for which the Association may properly borrow from the Treasury.

It is the opinion of the Treasury Department that the Association may properly borrow from the Treasury for the purpose of assuring the timely payment of principal and interest on guaranteed pass-through type mortgage-backed securities as described in Chapter 3 paragraph 6 of the Mortgage-Backed Securities Guide dated December 1969. Accordingly, the Treasury will make loans to the Association for the foregoing purposes under the procedure provided in subsection (d) of Section 306 of Title III of the National Housing Act.

Sincerely,
DAVID M. KENNEDY

The Honorable George Romney
Secretary of the Department of
Housing and Urban Development
Washington, D.C. 20410

Graduated Payment Mortgages

The Securities are based on and backed by a pool of mortgage loans (the “Mortgages”) described below. The Issuer has represented that the Mortgages are single-family, graduated payment mortgages (“GPM”) insured by the Federal Housing Administration (“FHA”) or guaranteed by the Department of Veterans Affairs (“VA”). The term “mortgage,” as used herein, includes both a note and the mortgage or deed of trust by which it is secured.

The Issuer has also represented, except as otherwise disclosed in the “Annex—Special Disclosure” (the “Annex”), that (a) there is no age limitation on the first scheduled monthly payment of each Mortgage, (b) at least 80% of the original principal amount of the pool constitutes Mortgages that have maturities that are within 30 months of the maturity of the Mortgage with the latest stated maturity, (c) at least 90% of the original principal amount of the pool constitutes Mortgages that have original maturities of 20 years or more, (d) each Mortgage bears interest at a fixed rate of interest throughout the term thereof, which exceeds the interest rate of the Securities by 0.50%, and (e) no Mortgage is more than 60 days delinquent as to scheduled payments as of the Issue Date.

If any of the foregoing representations, or any other representation made by the Issuer, are incorrect with respect to any Mortgage, the Issuer may be required by Ginnie Mae to purchase the Mortgage from the pool. Additionally, if any Mortgage comes into default and continues in default for a period of 90 days or more, the Issuer is permitted to purchase it from the pool. In either event, the remaining principal balance of the Mortgage will be passed through to the Security Holders as an unscheduled recovery of principal. See “Maturity, Prepayment, and Yield” herein.

As described below, the borrower’s monthly payments under a GPM are gradually increased at predetermined rates during the first five or ten years of the Mortgage. Thereafter, monthly payments are fixed at a level amount sufficient to amortize the Mortgage over its remaining term.

During the initial term of a GPM (before the monthly payment has fully increased), interest accrued on the Mortgage will generally exceed the borrower’s monthly payment. Any such accrued interest which is not then payable (“Deferred Interest”) will be added to the remaining principal balance of the Mortgage, and thereafter, interest will accrue on such increased balance. As a result of this arrangement, the amortization of GPMs (*i.e.*, the rate that principal is repaid) is *slower* than comparable level payment mortgages.

The payment characteristics of mortgages included in a GPM pool are indicated by the two letter suffix appearing in the security’s pool number listing and in its security number: (i) for “GP” pools, the monthly payment on each mortgage increases by 2 ½, 5 or 7 ½ percent annually for the first five years of the term of the mortgage, and (ii) for “GT” pools, the monthly payment on each pooled mortgage increases by 2 or 3 percent annually for the first ten years of the term of the mortgage.

Under each Mortgage, the amount of Deferred Interest that may be applied to increase the principal balance thereof is limited to specified levels. Each such limitation is calculated on the basis of the loan amount and interest rate borne by the Mortgage. The following table sets forth

the maximum permitted amount of Deferred Interest for a Mortgage (per \$1,000 original principal balance) based on the assumed Mortgage rates indicated below:

| <u>Loan Interest Rate</u> | <u>Maximum Principal Increase Per \$1,000</u> | |
|---------------------------|---|-----------|
| | <u>GP</u> | <u>GT</u> |
| 10% | \$ 60.80 | \$ 54.63 |
| 12% | 84.38 | 84.14 |
| 14% | 105.14 | 111.44 |
| 15% | 123.33 | 136.06 |

Book-Entry Registration

The Securities initially will be issued and maintained in uncertificated, book-entry form. Subsequent to closing, however, an investor may request that its Security be issued in certificated form. So long as they are maintained in book-entry form, the Securities may be transferred only on the book-entry system of the Depository. In the case of the book-entry Securities, Ginnie Mae guarantees only that payments will be made to the Depository in whose name the Security is registered.

Investors in book-entry Securities will ordinarily hold such Securities through one or more financial intermediaries, such as banks, brokerage firms, and securities clearing organizations. An investor in a Security held in book-entry form may transfer its beneficial interest only by complying with the procedures of the appropriate financial intermediary and must depend on its financial intermediary to enforce its rights with respect to a book-entry Security.

Certificated Registration

By request made through the Issuer or a securities dealer, accompanied by a transfer fee, an investor in book-entry Securities may receive from the transfer agent (“TA”) for the Securities a Security in fully registered, certificated form.

Securities held in fully registered, certificated form will be fully transferable and assignable, but only on the security register maintained by the TA (the “Security Register”). A Security Holder of a fully registered, certificated Security or its designated representative may transfer ownership or obtain a denominational exchange of its Security on the Security Register upon surrender of the Security to the TA at its Ginnie Mae transfer window, or through the mail, if the Security is duly endorsed by the Security Holder using the form of assignment on the reverse side thereof or any other written instrument of transfer acceptable to Ginnie Mae. A service charge in an amount determined by Ginnie Mae will be imposed for any registration of transfer or denominational exchange of a Security, and payment sufficient to cover any tax or governmental charge in connection therewith will also be required.

Payments of Principal and Interest

The Issuer is required to make payments to registered holders of the Securities in monthly installments by the fifteenth calendar day of each month, except as stated below, with the first such payment to be made by the fifteenth calendar day of the first month following the month in which the Issue Date occurs.

Amounts payable on each Security in respect of interest on each monthly payment date will equal the product of (i) one-twelfth of the interest rate specified on the cover page hereof, and (ii) the remaining principal balance of such Security at the end of the prior month, *less* any Deferred Interest described below. Principal payments on each monthly payment date will equal the sum of (i) all scheduled principal payments due on the Mortgages on the first day of the month of such payment date, and (ii) all unscheduled payments (including prepayments) and other recoveries received on the Mortgages during the preceding month. The maturity date for the Securities is set forth on the cover page hereof and is based on the latest maturity date of any Mortgage included in the pool.

If the amount of interest accrued on the principal balance of a GPM at the applicable rate exceeds the borrower's monthly payment, the payment of such excess interest (as previously described, "Deferred Interest") may be deferred and the amount thereof added to the principal balance of such Mortgage. To the extent any Deferred Interest is added to the principal balance of a Mortgage, such Deferred Interest will reduce interest payable to, and will be added to the remaining principal balance of, the Securities.

The Issuer is required to pay to investors holding certificated Securities and make available to the Depository, as Security Holder of the book-entry Securities, the full amount of principal and interest described above (giving effect, in the case of the Securities' monthly interest entitlement, to reductions thereto in respect of Deferred Interest) on each monthly payment date regardless of whether sufficient amounts have been collected on the Mortgages.

Monthly payments on the Securities will be allocated among the holders of each Security in the proportion that the original principal amount of such Security bears to the aggregate original principal amount of the Securities.

Monthly payments on Securities held in book-entry form will be made available for Automated Clearing House (ACH) transfer on the fifteenth day of each month (or, if such day is not a business day, the first business day following such fifteenth day) to the Depository for allocation and payment to investors in accordance with the Depository's procedures.

Monthly payments on Securities held in fully registered, certificated form will be paid to the Security Holder in whose name the Securities are registered on the last day of the month preceding the month in which the payment is made. Payments will be made by check or, at the Issuer's election and with the consent of the Security Holder, by ACH transaction or other electronic transfer, or in such other manner as may be prescribed by Ginnie Mae. Final payment on a fully registered, certificated Security will be made only upon surrender of the outstanding certificate.

Denominations

The Securities will be issued in minimum dollar denominations representing initial principal balances of \$1,000 and in multiples of \$1 in excess thereof.

Servicing of the Mortgages

Under contractual arrangements between the Issuer and Ginnie Mae, the Issuer is responsible for servicing and otherwise administering the Mortgages in accordance with FHA or VA requirements, as applicable, Ginnie Mae requirements, and servicing practices generally accepted in the mortgage lending industry.

As compensation for its servicing and administrative duties, the Issuer will be entitled to retain from each interest payment collected on a Mortgage one-twelfth of 0.50% of the actual principal amount of such Mortgage. Late payment fees and similar charges collected will be retained by the Issuer as additional compensation. The Issuer will pay (a) to Ginnie Mae monthly a guaranty fee of not more than one-twelfth of 0.06% of the outstanding principal amount of the Mortgages and (b) all other costs and expenses incident to the servicing of the Mortgages.

Custodial Agent

The underlying loan documentation for the Mortgages will be held in custody by a document custodian acceptable to Ginnie Mae.

Termination of Pool Arrangement

The pool arrangement may be terminated at any time prior to the maturity date of the Securities, provided that the Issuer and all holders of the outstanding Securities have entered into an agreement for such termination. Upon formal notification with satisfactory evidence that all parties to the termination agreement have concurred, and return of all certificated Securities to Ginnie Mae for cancellation, the guaranty will be terminated.

Federal Income Tax Aspects

A Security Holder generally will be treated as owning a pro rata undivided interest in each of the Mortgages. Accordingly, each Security Holder will be required to include in income its pro rata share of the entire income from the Mortgages, including interest (without reduction for servicing fees, to the extent those fees represent reasonable compensation for services) and discount, if any. The income must be reported in the same manner and at the same time as it would have been reported had the Security Holder held the Mortgages directly.

A Security Holder will generally be entitled to deduct its pro rata share of servicing fees, to the extent those fees represent reasonable compensation for services. However, an individual, trust, or estate that holds a Security directly or through a pass-through entity (e.g., a partnership) must treat servicing fees as miscellaneous itemized deductions, which are deductible only to a limited extent in computing taxable income and which are not deductible in computing alternative minimum taxable income.

Interest paid on the Securities will qualify as portfolio interest. Consequently, payment of interest to a Security Holder who is a non-resident alien or a foreign corporation will not be subject to withholding tax provided that the Security Holder properly certifies to the withholding agent the Security Holder's status as a foreign person.

Ginnie Mae does not allow any loan originated prior to 1985 to be included in pool or loan packages issued on or after September 1, 2004.

THE FOREGOING REPRESENTS ONLY A SUMMARY OF CERTAIN FEDERAL INCOME TAX CONSEQUENCES RELATED TO AN INVESTMENT IN A SECURITY.

PROSPECTIVE INVESTORS SHOULD CONSULT THEIR OWN TAX ADVISORS REGARDING THE TAX TREATMENT OF THE ACQUISITION, OWNERSHIP, AND DISPOSITION OF A SECURITY.

Maturity, Prepayment, and Yield

An investor considering a purchase of the Securities should consider the following factors.

1. The rate of principal payments (including prepayments) of the Mortgages underlying the Securities will affect their weighted average lives and the yields realized by investors in the Securities. The Mortgages do not contain "due-on-sale" provisions. Any Mortgage may be prepaid in full or in part at any time without penalty. The rate of payments (including prepayments and recoveries in respect of liquidations) on the Mortgages depends on a variety of economic, geographic, social, and other factors, including prevailing market interest rates. The rate of prepayments with respect to single-family mortgage loans has fluctuated significantly over the years. Also, there is no assurance that prepayment patterns for the Mortgages will conform to patterns for conventional fixed-rate mortgage loans. In general, if prevailing mortgage interest rates fall materially below the stated interest rates on the Mortgages (giving consideration to the cost of refinancing), the rate of prepayment of those Mortgages would be expected to increase. Conversely, if mortgage interest rates rise materially above the stated interest rates on the Mortgages, the rate of prepayment of those Mortgages would be expected to decrease.
2. Due to the payment characteristics for the GPMs described herein, the Securities (absent prepayment and default considerations) will have a longer weighted average life than securities backed by comparable level payment mortgages.
3. Following any Mortgage default and the subsequent liquidation of the underlying mortgaged property, Ginnie Mae guarantees that the principal balance of the Mortgage will be paid to Security Holders. As a result, defaults experienced on the Mortgages will accelerate the distribution of principal of the Securities. Prepayments may also result from the repurchase of any Mortgage as described herein.
4. The yields to investors will be sensitive in varying degrees to the rate of prepayments (including liquidations and repurchases) on the Mortgages. In the case of Securities purchased at a premium, faster than anticipated rates of principal payments could result in actual yields to investors that are lower than the anticipated yields. In the case of Securities purchased at a

discount, slower than anticipated rates of principal payments could result in actual yields to investors that are lower than the anticipated yields.

5. Rapid rates of prepayments on the Mortgages are likely to coincide with periods when prevailing interest rates are lower than the interest rates on the Mortgages. During such periods, the yields at which an investor may be able to reinvest amounts received as principal payments on the investor's Securities may be lower than the yield on those Securities. Slow rates of prepayments on the Mortgages are likely to coincide with periods when prevailing interest rates are higher than the interest rates on the Mortgages. During such periods, the amount of principal payments available to an investor for reinvestment at such high rates may be relatively low.

6. It is highly unlikely that the Mortgages will prepay at any constant rate until maturity or that all of the Mortgages will prepay at the same rate at any one time. The timing of changes in the rate of prepayments may affect the actual yield to an investor, even if the average rate of principal prepayments is consistent with the investor's expectation. In general, the earlier a prepayment of principal on the Mortgages, the greater the effect on an investor's yield. As a result, the effect on an investor's yield of principal prepayments occurring at a rate higher (or lower) than the rate anticipated by the investor during the period immediately following the Issue Date is not likely to be offset by a later equivalent reduction (or increase) in the rate of principal prepayments.

7. The effective yield on any Security will be less than the yield otherwise produced by its stated interest rate and purchase price because interest will not be paid to the Security Holder until the fifteenth calendar day of the month following the month in which interest accrues on the Security.
